

E series

Strong construction, suitable for multiple placements  
Ideal for medium to large consumption outlets

DOUBLE DOORS

DOUBLE DOORS  
E series

Technical Specifications

|                               |                                     |
|-------------------------------|-------------------------------------|
| Model                         | SPE-1003                            |
| Refrigerant                   | R134a                               |
| External Dimension WxDxH (mm) | 1050x710x1930mm                     |
| Certification                 | CE, SaSO, RoHS                      |
| Cooling Performance           | 0° ~ +7°C T=32°C/RH 65%             |
| Capacity (Lts)                | 1000                                |
| Defrost                       | off cycle                           |
| Weight (kg)                   | 130                                 |
| External Material             | polyester powder coated steel sheet |
| Door type                     | swing self-closing door             |
| Cabinet Lighting              | 1 x LED                             |
| Evaporator fan motor          | DC                                  |
| Compressor                    |                                     |
| Evaporator                    | fine & tube                         |
| Condenser                     | wire & tube                         |
| No of adjustable shelves      | 10                                  |
| Facing x No of 330ml can      | 980 / 14 facing                     |
| Facing x No of 500ml glass    | 490 / 14 facing                     |

Remarks: the above designs and specification are subject to change due to product improvement without prior notice.

Equipped with free maintenance condenser  
Automatic defrost  
DC fan motor, low energy consumption  
LED Lighting
